

Introduction	1
PHS capacity-building strategies	5
PHS actions for building capacity	17
PHS actions for building capacity in assessment	19
Assessment strategy 1: Developing health information and health information systems that are useful to legislative and executive governmental bodies at the Federal, State, and local levels, and to other groups and organizations	19
Assessment strategy 2: Making health information available to State and local health departments, Federal agencies, and other users, employing appropriate new technology	29
Assessment strategy 3: Building the capacity of State and local health departments and other relevant organizations to use health information systems to prevent disease, promote health, and increase access to services in their communities	34
Assessment strategy 4: Evaluating the impact of public health programs and policies	40
PHS actions for building capacity in policy development	43
Policy development strategy 1: Developing goals for public health at the national, State, and local levels	43
Policy development strategy 2: Developing strategies and programs to realize the goals	47
Policy development strategy 3: Developing support for public health beyond the traditional circle of partners	54
PHS actions for building capacity in assurance	59
Assurance strategy 1: Developing and maintaining the capacity of public health agencies at the State and local levels, and other organizations, to plan, implement, and assure the quality of the services that they provide or need to provide	59
Assurance strategy 2: Helping to obtain fiscal resources to enable public health agencies at the State and local levels, and other relevant organizations, to assure delivery of public health services and to enhance the capacity of the public health infrastructure	67
Assurance strategy 3: Helping to ensure an adequate supply of appropriately trained health personnel	70
Assurance strategy 4: Collaborating with other Federal agencies on effective ways, including regulatory approaches, to address and solve problems in service delivery	74
Assurance strategy 5: Broadening the partnership for assuring the delivery of public health services	77
Assurance strategy 6: Providing health information and related services directly to the public	80
